

What is Direct Primary Care?

Direct Primary Care is a fast-growing and innovative approach for a patient and/or family to join a Primary Care Practice. One of the greatest features of Direct Primary Care is the extreme affordability. For a reasonable monthly fee, there are many features to enjoy. Direct Primary Care is an ideal solution for Medi-Share Members (with a high AHP) who want to be good stewards of their finances.

Why Direct Primary Care?

One of the major advantages to being a part of the Medi-Share family is that you have multiple options when it comes to accessing health care. Effective December 1, 2020, Members on the \$12K AHP can now choose from a network of Direct Primary Care providers in addition to the PPO network and free Telehealth.

How Does Direct Primary Care Work?

Members on the \$12,000 AHP who use a Direct Primary Care provider can submit up to \$1,800 of their DPC fees for sharing. If the Annual Household Portion (AHP) has not been met, the Direct Primary Care fees will be applied directly to the AHP. To learn more about Direct Primary Care or to search for a DPC provider in your area, visit mapper.dpcfrontier.com.
